WE KNOW POLICE ARE AFFECTED TOO!

Being a police officer is a difficult job at any time. But when the job changes from helping and protecting the community, to enforcing rules that destroy lives, it takes away the part of the job that most police find rewarding.

- Have you been forced to violate your own integrity to enforce laws you know are harmful?
- Have your seniors forced you to commit acts that violate people's human rights, on the threat of losing your own job?
- Do you want to quit the force, but can't risk it because the government have destroyed jobs and the economy?

YOU CAN STILL MAKE A POSITIVE DIFFERENCE.

We want to hear your story, and help raise public awareness that police are not the real enemy. Send in your experiences anonymously at rdamaribyrnong@protonmail.com

You can optionally leave details to be contacted for any assistance you may need.
